## Regen 2000 Firestik Protection Management Program

The Regen 2000 Firestik products offer a cost effective, protection management program for improving yield by triggering plant response to naturally occurring active compounds proven to increase germination rates and enhance overall plant health and performance.

### STEP 1 SEED STARTER GERMINATION

**Regen 2000 Firestik Seed Starter**  
In furrow at sowing

100mL-150mL per hectare

**COST: \$0.76 per hectare**

### STEP 2 RECHARGE PLANT HEALTH MID SEASON

**Regen 2000 Firestik Recharge**  
Mid season foliar application:

- Cereals (late tillering)
- Brassicas (bolting)

400mL-800mL per hectare

**COST: \$6.08 per hectare**

### STEP 3 PROTECT PLANT HEALTH LATE SEASON

**Regen 2000 Firestik Recharge**  
Late season foliar application:

- Cereals (early head emergence)
- Brassicas (podding)

800mL-2 L per hectare

**COST: \$7.60 per hectare**

### STEP 4 RESILIENCE

**Regen 2000 Firestik Recharge**  
Late season foliar applications:

- Legumes crops (pod fill)
- Brassicas (podding)

800mL-1200mL per hectare

**COST: \$7.60 per hectare**

Note: Quoted prices are based on \$7.60 per litre of Regen Firestik.
