REGEN SMOKEMASTER

Regen 2000 Smokemaster is a water-soluble liquid smoke extract, containing many beneficial smoke compounds proven to trigger germination and early plant development in native and non-native varieties.

GERMINATION

REGEN SMOKEMASTER BENEFITS

- + Improves & increases uniformed germination rates
- + Promotes healthy & accelerated seedling growth
- + Induces plant fungal infection response
- + Improves germination rates of difficult species

Nursery (Native & Exotic Seeds)

Regen 2000 Smokemaster has been designed to be applied as a seed soak prior to propagation or sprayed directly onto seedling trays after sowing.

Broadacre, Horticulture & Viticulture

Regen 2000 Smokemaster is suitable for applying under vine in vineyards, directly as a seed treatment prior to sowing or in-furrow for broadacre cropping.

Product Code: SBREGSM

Pack Size: 5kg, 10kg, 20kg, 220kg, 1000kg

REGEN SMOKEMASTER INSTRUCTIONS FOR USE

For best results, sowing and smoking should be carried out when germination is most likely to occur. Seeds can be treated by soaking in a diluted solution for 6 – 36 hours until seeds begin to swell.

Treated seeds should then be dried and sown when required. Alternatively, trays containing sown seeds can be sprayed with undiluted Regen 2000 Smokemaster and carefully watered for the first 6 – 10 days to ensure adequate penetration of smoke compounds.

Dilute 100mL to 1 L water Soak seeds

Seed Soak

- Dilute 100mL to 1 litre water
- Soak seeds as directed

Spray undiluted 100mL to 1 sqm

Seed Tray

- Spray undiluted 100mL to 1 sqm

Note: Regen 2000 Smokemaster is water soluble and over watering of seed trays can leach active agents from the medium before seed dormancy has broken.
