

**Do you really know what's
in your water?**

**Do you want to control
biofilm and pathogens?**

**Keeping your
water clean with**

Vibrex

VIBREX, a stabilised chlorine dioxide (ClO₂) is designed for sanitising irrigation water and removing biofilms from pipes and sprinklers.

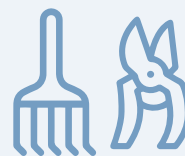

CAN BE USED TO:

**KEEP PLANTS
HEALTHY**

**CLEAN SURFACE
AREAS**

**CLEAN
TOOLS**

**KEEP STAFF
SAFE**

WATER TREATMENT & BIOFILM CONTROL

Biofilms are the slimy layer that form inside irrigation lines, created by dangerous pathogens which are in the water supply. As the pathogens multiply they are able to breakaway causing disease infestations and nozzle blockages.
